A Message from the Chancellor

The University of Illinois at Urbana Champaign is an economic engine and a driver of innovation, deeply rooted in the Illinois prairie and engaged statewide, from Cook County to Cairo. Illinois Extension brings the University to your doorstep. Extension educators live and work alongside you in every county, allowing the university to support local leaders, businesses, farmers, and residents to address grand challenges and everyday problems with practical, research-based solutions. As a youth, my own 4-H experience inspired a rewarding career in agricultural research and higher education. Today, it’s an honor to lead this great public university and deepen its commitment to serve the people of Illinois.

Robert J. Jones
Chancellor, University of Illinois

A Message from the County Director

It is my pleasure to represent a staff of outstanding professionals who strive daily to positively impact the lives of the citizens of DeWitt, Macon and Piatt counties. I am continually amazed at the level of innovation and diversity found in our educational programming. I believe the work done by the staff of University of Illinois Extension in DeWitt, Macon and Piatt counties truly epitomizes Extension’s motto of Extending Knowledge, Changing Lives.

Enclosed in this report, you will find information showing the impact our programs have on our region. Our programming reaches audiences of all ages and addresses the wide variety of community needs in all three counties. There is not enough room in this report to tell the story of all of the innovative and educational outreach presented by the staff, nor of the impact of those programs. I hope you will take the time to learn more about our programs, volunteers, and impact.

Thank you for your continued support of Illinois Extension in DeWitt, Macon and Piatt counties.

Doug Harlan
County Extension Director

Make the Best Better with 4-H

With a 100 year history to build on, 4-H in DeWitt, Macon and Piatt counties is able to succeed in providing meaningful and educational youth experiences by being flexible. As kids change, we change. In addition to our touchstone community clubs and foundation of agriculture-related projects, we have added more projects that meet the growing demand for STEM – science, technology, engineering and math – learning. We have expanded the roles teens may explore such as teaching, mentoring, and advocacy, and we have adjusted 4-H to fit the lifestyle of active metro audiences. Through 4-H, youth are able to learn by doing, have fun, make mistakes, ask questions, and connect with real world examples. None of this would be possible without a dedicated volunteer base. Our volunteers help 4-H members build something today that lasts forever.

JESSICA ANDERSON was honored for her lifetime 4-H achievements with an Illinois State 4-H award in communications. The award recognizes exemplary work in communications, community service, leadership, personal growth, and project mastery.

ANDREW CUNNINGHAM received the Illinois Farm Bureau Leadership, Citizenship, and Professionalism Award. Andrew also received the Illinois 4-H Foundation Legacy of Leadership scholarship.

TAYLOR CROUCH received the diamond level 4-H Experience Award for her project work. Illinois 4-H challenges youth to try new things, experiment in project areas they may enjoy, and explore opportunities around the state and country.

Macon County State Award Winners

4-H in Decatur Public Schools
Experiential learning focuses on learning by doing. Teachers in the Decatur Public School system regularly access the innovative 4-H curriculum to implement lessons on STEM, food science, agriculture, and healthy living and nutrition.

ADM Cares, the Howard Buffett Foundation, Macon County 4-H Foundation, and the generous support of additional donors have been instrumental in providing financial support to implement 4-H into Decatur Public Schools and Macon County.

Hands-On Ag Science
*Harvest Heroes* is a two-week after-school program funded through ADM Cares. Elementary school students are exposed to fun, engaging and interactive activities focused on enhancing students' interest in STEM and agricultural life science fields.

What Does Being a Leader Mean?
**MADDIE FRANKLIN, DEWITT COUNTY 4-H MEMBER**
Illinois State 4-H Leadership Award Winner

When I was younger, I observed other 4-H member and leader examples. Now that I'm older, I implement my knowledge through leading and teaching others.

Becoming a leader has made an impact on my future goals. When I was little, being someone who can lead, teach, and speak were not skills I had in mind. But now, as I've participated in 4-H, had the example set, and grown to become a person who enjoys speaking and leading, I've found that is at the forefront of my mind.

My goal now is not only to continue to mentor 4-H youth through my roles as a Federation member, senior 4-H member, and 4-H robotics team lead, but also to do this in a future job setting. I hope to not only pursue my love of technology, but also to lead and pass on what I have learned.
Are You Ready for the Challenge?

The 4-H Food Challenge contest challenges teams of youth to create a dish using a preselected set of ingredients and a pantry of various items. From these ingredients, team members had to make a dish to present to judges in a limited amount of time. Their presentations had to include nutritional facts, food safety, and how the group made the dish.

I realized I wasn’t eating as healthy as I thought.
FOOD CHALLENGE PARTICIPANT

Because of the 4-H Food Challenge...

- 79% Of participants are more comfortable speaking with others
- 93% Have changed how they handle and prepare food
- 79% Can create a dish without using a recipe
- 100% Are more comfortable working in a team
- 93% Have increased their job skills

Teen Teacher Rebecca Maple keeps a close eye on Brielle Puckett as she puts her group’s green bean casserole in the oven.

Q&A With a Teen Teacher

REBECCA MAPLE, 16, CERRO GORDO

Why did you want to be a 4-H Teen Teacher?
I wanted to be able to make a positive impact on the younger people in my community.

What is your favorite thing about being a 4-H Teen Teacher? My favorite thing is when the kids first see you and they run up and want to tell you about their day. Or, that they made something at home or with their family that we learned how to make in class.

What have you learned about yourself? I’ve learned how much fun it can be to make a positive impact on your community and that I really enjoy teaching.

How can you use what you learned? I learned a lot of leadership skills, and I think that will be really helpful to me both in school and in my future.

Why is being a 4-H Teen Teacher important to you? It allowed me to be with young kids in my community, and hopefully, to positively impact their life. I also really love being able to teach them something new.

100% Of teens agree this program will help them in the future

Inaugural Garden Walk a Success
Despite a surprise thunderstorm, 315 people from 29 counties attended the first Garden Walk hosted by the Piatt County Master Gardeners on July 14. The Piatt County Garden Walk made $1,000, which will be used to support Master Gardener community outreach and education in Piatt and DeWitt counties.

Growing Gardening Insights
The annual Gardening Insights day of education hosted by the Macon County Master Gardeners consisted of numerous sessions covering a wide variety of topics such as Beneficial Insects and Bio Pesticides, Edible Flowers, Urban Vegetable Gardening and Native Illinois Shrubs for the Urban Landscape.

Getting Dirty with Hands On Learning
There's no better way to learn than to roll up your sleeves and get your hands dirty. Horticulture educator Candice Hart led ten Hands On with Hart programs for 279 participants on topics ranging from rain barrels, cacti and succulents, cut flower gardening, hydroponics, and wreath making. Participants took home a finished project and the knowledge and confidence they could do it for themselves.

Master Gardeners & Horticulture

I enjoyed all the gardens. There's a good selection for everyone to see. I'm already looking forward to the next Garden Walk.

GARDEN WALK PARTICIPANT

The Garden Walk included tours of six home gardens and a walking tour of Monticello's downtown gardens.

A New Way of Training Volunteers
After recognizing that working adults were interested in becoming Master Gardener volunteers, but could not attend daytime training, we shifted our approach. In-house classes took place during the evening for the first time and trainees could also watch supplemental video instructions from home.

As a result, the number of trainees more than doubled from last year and other counties are now following this model. And because of this growth, a new project is underway in Piatt County, and DeWitt County will have its first Master Gardener project ever in 2019.
Horticulture Education Starts Early

If you can't bring students to the garden, bring the garden to the students. The Horticulture team taught a variety of youth workshops in 2018, from worm composting to native pollinators, many of which included an in-class gardening project.

Virtual Gardening Answers

Extension is committed to reaching new audiences, which means moving online. In 2018, Horticulture educator Candice Hart participated in a Facebook Live With the Horticulturists project. A team of horticulture educators did a series of live video streams from the state Extension Facebook page. Viewers asked questions in real time and got immediate answers they could trust. When to harvest garlic, recommendations for a flooding lawn and how to grow a fig tree were a few topics covered in just one broadcast.

SUPPLEMENTAL NUTRITION ASSISTANCE PROGRAM EDUCATION (SNAP-EDUCATION)

SNAP-Education staff work with Illinois families in need to make the healthier choice an easier choice where they eat, shop, live, play, and learn. Through classes and workshops, and by collaborating with community partners to adopt research-based solutions to encourage healthier nutrition and activity choices, SNAP-Education positively impacts the families and communities we serve.

CSA Insider - What’s in Your Basket?

In the summer of 2018, the Nutrition & Wellness program bought a weekly CSA share – community supported agriculture – from a Macon County farm. From that project, known as CSA Insider, Extension shared:

- 46 recipes
- 31 new videos
- 14 weekly electronic newsletters

Participants received a weekly e-newsletter with recipes using ingredients from that week’s CSA box, tutorial videos, food preservation ideas, tips on using blemished foods and conversation starters for talking with farmers.

The SNAP-Ed team frequently used the CSA to make recipe samples for educational activities. One week, a 4-H restaurant entrepreneur club used the produce.

Recipes and tips were also shared on the Know How, Know More blog and videos on YouTube, Facebook and Twitter had more than 1,300 views.

Not a Number: Diabetes & Seniors

More than 1 in 3 adults in Illinois have prediabetes, according to the Illinois Department of Public Health. Higher than normal blood glucose levels increase risks of heart disease, stroke, and type 2 diabetes. Extension worked with four community partners in DeWitt and Piatt counties to provide a prediabetes workshop. About 40 adults learned how food components such as carbohydrates impact blood glucose. Participants also compared different meals to predict how blood glucose would rise and fall.

Nearly 1 in 5 adults in DeWitt, Macon, and Piatt counties are age 65 or older. In 2018, Nutrition & Wellness educator Caitlin Mellendorf led programs for 100 adults age 60 and older. Topics included food and drug interactions, food budgets, vitamins and minerals, and more. Many participants reported they would try new foods, including fruits and vegetables, check if their medications have food-drug interactions, and eat smaller portions.
Glacier’s Edge Master Naturalists Give Back

The Glacier’s Edge Master Naturalists grew by 12 new members in 2018, and now have 58 volunteers. In addition to their regular community outreach projects, the Master Naturalists also hosted a bird watching field trip to the Emiquon National Wildlife Refuge and toured geological sites in Macon County.

Mercy Gardens Grows Urban Independence

Since 2015, Extension’s Local Foods program has partnered with Mercy Gardens to provide training for the urban garden program which grows 50,000 pounds of produce annually for Decatur residents. U of I researchers also began a soil study in the area to learn more about gardening in heavy metal-contaminated soils.

The Dean of the College of ACES, Kimberlee Kidwell, toured the facilities in the spring and was very impressed with this innovative program and Extension’s partnership.

Organic Corn Field Day Reaches Local Farmers

Extension educator Doug Gucker met with 15 area farmers to discuss organic corn production and marketing at the first local Organic Corn Field Day on August 29. Two Mile Creek Organic Farms and fourth-generation farmer Steve Buxton hosted the event on his Sullivan farm.

Empowering Women in Ag

In Illinois, 1 out of 3 farm operators are women, according to the Illinois Department of Agriculture. Our Local Foods and Small Farms program partnered with Annie’s Project in Illinois to offer the first Know Your Numbers, Know Your Options training. Over five weeks, 11 area women learned about the fundamentals of farm accounting and financial record keeping.

Youth with a Positive Direction
The 2018 operating budget was $1.5 million. Extension is funded through a combination of locally raised, county board, state, and federal dollars, which are returned to the community through educational programming.

Extension’s mission is to extend knowledge to our communities in a variety of formats and Extension is a leader in online education. This includes regular digital outreach using our website, e-newsletters, videos, social media, and the Out Standing in the Field agricultural podcast available for streaming on iTunes. Special projects included a Snapchat filter provided at the 4-H shows, a weekly summer CSA e-newsletter, and a series of horticulture live streaming videos.

The website for Extension in DeWitt, Macon and Piatt counties is the second most viewed in our state network, and 3,650 people follow us on social media. In 2018, 55 original videos were shared on social media.
